

SMILE LIKE A CELEBRITY

ULTRATHIN Smiles is a brand new concept in cosmetic dentistry and is now the buzzword of many celebrities. Its founder, Dr. Rahul Doshi, of The Perfect Smile Advanced Training Institute tells us more...

It is the in thing that now provides a solution to the disadvantages of traditional veneer techniques. ULTRATHIN Smiles has been created to increase the life of cosmetic smile makeovers. It is a more conservative approach to improving smiles where hardly any tooth is removed.

THE BENEFITS

1. NO DRILLING

If you don't want your teeth to be drilled or to lose any tooth tissue this is for you.

2. PAINLESS

In most cases, since very little tooth enamel is adjusted there is often no need for any injections.

3. RESULTS

ULTRATHIN veneers provide you with a beautiful bright new smile. You will look years younger and feel like a new you! You

can alter discrepancies in your smile and keep the aspects you like.

4. NO SENSITIVITY

The process is not as invasive as traditional veneers. This means that no dentine is exposed and hence there is no post-operative sensitivity.

5. ULTRATHIN

This is an ideal combination treatment with orthodontic teeth straightening since the veneers are extremely thin.

This new ULTRATHIN advanced technology is perfect for those who would like to enhance their smiles but do not want to have their natural teeth drilled down in the process.

Smiling should be a happy, enjoyable experience, not stressful or embarrassing. With ULTRATHIN you

no longer have to hide your smile...and you don't have to endure lengthy, uncomfortable procedures to get the smile you enjoy sharing with the world.

Dr. Doshi believes that dentists should be dedicated to creating mouths that look great, feel great and that function satisfactorily. He and his team of specialists work consistently towards creating beautifully balanced healthy mouths.
